

LOTUS

ETHANOL FIREPLACE

Commerce Technology®

COMMERCE TECHNOLOGY®

Planika developed a uniquely safe Commerce Technology®, which is based on highly absorbent ceramic fibers. The cluster of fibers keeps the fuel inside the burner at all times, even if you accidentally tilt the fireplace.

CLEAN FIRE WITHOUT SMOKE

Lotus is powered by bioethanol, a renewable and carbon-neutral fuel made from biomass. It provides rich flame and clean burning without any smoke.

EFFICIENT FLAME

The burner holds up to 1.5 liters of bioethanol that gives you even 3.5 hours of rich and golden flame.

GLASS CYLINDER

This durable glass cylinder protects the flame from any air blows, making it stable at all times.

PORTABLE DESIGN

Lotus is a fully portable fireplace without any hard connections. It takes little space so you can freely arrange it in any space.

UNIQUE DESIGN AND TOP BUILD QUALITY

With its uniquely-designed base, Lotus makes an elegant and eye-catching decoration anywhere you place it. It is built to the highest quality standards. Made of best materials and components, it is always safe and reliable.

Lotus

(Commerce Technology®)

Fuel tank capacity	1.5 L
Maximum burn time	3.5 hours
Maximum heat output	2.5 kW
Minimum room cubature	25 m ³
Weight	4.5 kg
Fuel type	bioethanol 95 - 96,6%
Flue	not required
Air change rate	1 space volume per hour (indoor)
Finish	black powder coating
Materials	steel, glass
Application	for indoor and outdoor use
